INTERNATIONAL SCHOOL ON EMERGING TECHNOLOGIES OF GENERATIVE AI

May 4-6, 2026 ENET'Com - Sfax, Tunisia

Over three days, participants will gain practical and theoretical skills to work with Large Language Models (LLMs), build Retrieval-Augmented Generation (RAG) systems, and design autonomous AI agents. The bootcamp combines hands-on workshops, advanced prompt engineering, fine-tuning techniques, and methods for connecting AI models to private data and external tools, preparing attendees for real-world AI applications.

Day 1: Foundations & Mastering LLMs
Understand what happens "under the hood" of LLMs, explore decoder architectures, tokens, context windows, and learn advanced prompt engineering and fine-tuning techniques.

Day 2: RAG (Retrieval-Augmented Generation)
Learn to connect LLMs to private datasets, build pipelines using embeddings and vector databases, and mitigate hallucinations for reliable AI outputs.

Day 3: The Era of AI Agents
Design autonomous AI systems capable of reasoning and using tools, and create collaborative multi-agent frameworks for practical problem-solving.

Speakers

Bassem Ben Hamed, *ENET'Com, University of Sfax*
Nessrine Trabelsi, *ENET'Com, University of Sfax*

Organizing Committee

Omar Cheikhrouhou, *ENET'Com, University of Sfax*
Mouna Baklouti, *ENIS, University of Sfax*
Tarek Abbes, *ENET'Com, University of Sfax*
Amira Echtioui, *ENSTAB, University of Carthage*
Olfa Gaddour, *ENIS, University of Sfax*
Mohamed Neji, *ENET'Com, University of Sfax*
Ali Khalfallah, *ENET'Com, University of Sfax*
Fathi Kallel, *ENET'Com, University of Sfax*
Hassen Ben Ayed, *ENET'Com, University of Sfax*
Wassim Jmal, *ENET'Com, University of Sfax*
Raida Hentati, *ENET'Com, University of Sfax*
Yassine Aydi, *ENET'Com, University of Carthage*
